

## DigitalMeeting News

### Flying High with Aerospace

DigitalMeeting, an online conferencing and application sharing company based in Winchester have recently become members of the Society of British Aerospace Companies (SBAC), 21st Century Supply Chains (SC21), British Aviation Group (BAG) and West of England Aerospace Forum (WEAF).

We felt it was important to show our commitment to helping the supply chains within the Aerospace industry to thrive. What DigitalMeeting offers is invaluable to these businesses communication links with other businesses in the chain, internally and externally. They can share technical drawings and make amendments, agree them, then and there, in 'real time', review spreadsheet data and yet again amend online.

"We already have several companies registered and successfully using our service and saving them time and money" says Richard Butler CEO of DigitalMeeting Ltd. The companies all said they hadn't realised how easy it was to use and they loved that they could share information, particularly applications that other people didn't have and make decisions fast without anyone having to download software first.
